

A full-page background image of a diver underwater. The diver is a man with a tattoo on his left shoulder, wearing a red and black patterned swim cap, a black mask, and black fins. He is holding a GoPro camera in his right hand, which is extended towards the viewer. The water is clear and blue, with sunlight filtering through from above, creating a shimmering effect. The diver's body is angled diagonally across the frame.

## THE SUBLUE STORY

**Sublue** designs and manufactures innovative underwater scooters and drones at the forefront of industrial technology research and development. We are determined to create a new lifestyle of exploring the underwater worlds.

Sublue's two innovative product lines redefine enjoyment of discovering underwater worlds with over 190 technical patents supported for life adventures, travelers and environmentalists.

By constantly recreating its products, Sublue provides the most technologically advanced and user-first experience for all its consumers. The portable, compact devices are incredibly powerful and create a unique underwater experience.

2013

Subblue founded the first intelligent underwater equipment company in China.

2014

Received 10 million RMB Pre-A investment by TEDA Venture Capital Corporation Limited.

2015

Released underwater equipment to use in fishery, the mature and applicable technology laid a foundation for the next consumer product development.

2016

Received the hardware prize ChinaBang Award.

## 2019

Navbow won Golden Pin Design Award,  
and honored Innovation Award by CES;  
Swii won Red Dot Design Award.

## 2021

WhiteShark Tini honored iF Design Award.

## 2020

WhiteShark MixPro honored Innovation Award by CES;  
WhiteShark Tini Underwater scooter launched, modular design and wireless connections comprehensive upgrade.

# GROWTH BY NUMBERS

Subblue has accumulated an abundance of expertise in the subsea industry since 2013; In 2018, Subblue decided and fully prepared to develop consumer level underwater scooters and drones.

Within 2 years, Subblue has achieved:

Occupied nearly **65%** of the global underwater scooter market

Delivered **50,000+** underwater technology products

Built a global presence spanning **70+** countries

Customers use Subblue Products for:

### 70% Recreation

- Scuba diving
- Snorkeling
- Swimming

### 60% Profession

- Film / Photography
- Search / Rescue
- Marine environmental protection

### 55% Education

- Training novices at swimming
- Swimming strokes
- Kick drills

## Undeniably Powerful

Navbow® is the fastest among our Underwater Scooters with 3 Speed Switches of up to 2m/s. With our advanced and patented waterproof batteries, it can operate at depths of up to 40m and last for up to 60 minutes.

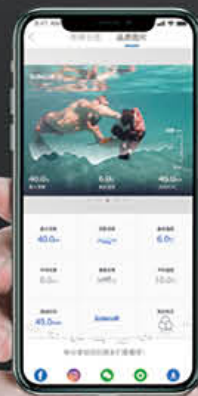

## Cutting Edge Technology

With Subblue's cutting-edge technology, confidently head out into the water and use the built-in compass, as well as the water depth and temperature sensors of Navbow®. This will help you better navigate your journey underwater.

## SubblueGo App

Select Navbow® on the app to generate your underwater experience logs, such as the water depth and temperature throughout your whole dive. Then, make sure your family and friends know what you're up to by sharing these logs on social media.

## Smart Safety Features

Navbow+ offers superior smart safety features, including a flashing OLED screen, buzzer, and auto-shutdown if something goes wrong during your dive. You can even customize the depth and remaining battery alarms according to your preference. So head out into the water and feel safe knowing that your underwater scooter has got you covered.

## Underwater Photography

Capture the most stunning underwater images with Navbow+. It can mount a Subblue photography platform where you can attach action cameras, waterproof LED lights, float arms, etc. Moreover, you can easily customize it according to your thirst for an underwater adventure.

## Durable and Reliable

With our latest anti-corrosion technology, Navbow+ is designed to be extra durable with hassle-free maintenance. This is to ensure that you'll be able to enjoy Navbow+ for a really long time. We definitely aim to give you value for your money.

### Single propeller mode, easy underwater swimming

A single propeller, compact and portable, can achieve two speed control, respectively 1.1m/s and 1.4m/s.

### Multi propeller mode, fly through the waters.

Assemble multiple propellers together, 2-in-1 mode can go as fast as 2m/s, 3-in-1 mode can go as fast as 2.4m/s and 4-in-1 can go 2.8m/s.

### Inflatable kickboard mode, double the family fun

Install the propeller to the bottom of the inflatable kickboard, choose different speeds of 1.1m/s or 1.4m/s. Glide on surface of water freely, double the family fun.

## Modular design , various modes of play

Innovation structure, unlock multiple combinations, flexible assembly, meet multiple needs.

## Wireless control technology

Low frequency communication technology is adopted to optimize the control algorithm to make the signal transmission more accurate and stable.

## Smartphone/Action camera mount

The general interface supports the mounting of smartphone and action camera to take wonderful pictures and share them immediately after landing.

Weight	1290g
Battery Life	Controller: 150Mins
Power system	
Dimensions	355 × 370 × 168 mm(L × W × H)
Speed	High speed: 1.4m/s Low speed: 1.1m/s

## SOCIAL RESPONSIBILITY

In 2019, one of the most famous ocean environmentalists – Hannah Fraser used Subblue WhiteShark Mix to assist her cleaning up the coastal water in Hawaii. As an ocean conservation advocate, Hannah Fraser does a variety of performance art worldwide to draw attention, such as dressing and swimming like a mermaid, creating her own spectacular tails, and attending public speaking events.

Subblue, a pioneer in environmental protection, has been inspiring and encouraging conservation. Therefore, we should adhere to the responsibility of developing subsea equipment and driving the industry for providing multiple usage scenarios.

We will always be persevering in protection of marine ocean and resources. Moreover, advocating for ocean protection.
